

SmokeESC AIP-3000

Pressure Sampling Point

Device description

AIP-3000 provides correct pressure difference readings thanks to the built-in filter. AIP-3000 protects measuring elements from dust and makes product maintenance free.

Features

Protection from pollution

Thanks to the built-in filter, dust and pollution occurring in buildings don't penetrate the air hose and pressure sensors.

Measurement filtration

AIP-3000 is limiting air turbulence and wind blow influence on pressure measuring results.

Compact design

Thanks to small dimension and muted colors AIP-3000 can be easily fitted inside any interior.

Technical parameters

Parameters	Value
Operating temperature	from -25 °C to +50 °C
Enclosure protection rating	IP20
Dimensions	49x77x37 mm
Weight	50 g
